Education

Associate Degree in Web Programming (In progress – 3rd year)
National University of San Juan – San Juan, Argentina

Professional Experience

Full Stack Web Developer
[Corvik Technology](#)   – San Juan, Argentina
September 2024 – Present

• Designed and developed scalable full stack web applications, applying clean code principles and layered architecture.
• Implemented automated tests (unit, integration, e2e) using Jest and Supertest to ensure code quality.
• Used modern technologies including React, Node.js, Express, PostgreSQL, and MongoDB.
• Refactored legacy modules, improving system performance by up to 30%.
• Collaborated in multidisciplinary teams using agile methodologies (Scrum), contributing to code reviews and technical decision-making.

Personal Projects

Resúmelo – Academic Summaries Platform
May 2025 – June 2025

Social platform for uploading, liking, and downloading academic resources.

• Full stack development with clean architecture (domain, infrastructure, and presentation).
• Next.js for SSR and UI; modular backend with Express.js.

- Cloudflare R2 for file storage; PostgreSQL for user data.
- Secure authentication, validation, and access control.
- Optimized frontend and backend performance.

Technologies: Next.js, Express.js, PostgreSQL, Cloudflare R2, JWT, React, Clean Architecture
Repository:Resumelo

Inventario Fácil – Inventory and Sales Management App
September 2024 – January 2025

Web app for managing inventory and tracking monthly sales.

- UI built with React.js and TypeScript, focused on usability.
- Backend with Express.js and MongoDB, including secure authentication and session handling.
- Integrated data visualization tools for displaying monthly statistics.
- Implemented user roles, access control, and route protection.

Technologies: React.js, TypeScript, Express.js, MongoDB, Chart.js, JWT
Repository:InvetarioFacil

Technical Skills
Languages: JavaScript, TypeScript, SQL
Frontend: React.js, Next.js, HTML, CSS
Backend: Node.js, Express.js
Databases: PostgreSQL, MongoDB
Testing: Jest, Supertest
Dev Tools: Git, GitHub, Postman, Figma
Other: Clean Architecture, JWT, REST APIs, Cloudflare R2
